

vaSoundMapScheme::Update

vaColorScheme::Update

vaBasicObject::CheckContext

```
graph LR; A[vaSoundMapScheme::Update] --> C[vaBasicObject::CheckContext]; B[vaColorScheme::Update] --> C;
```

The diagram illustrates a dependency or call relationship. Two white rectangular boxes on the left, labeled 'vaSoundMapScheme::Update' and 'vaColorScheme::Update', have blue arrows pointing to a single gray rectangular box on the right labeled 'vaBasicObject::CheckContext'. This indicates that both update methods rely on or invoke the check context method.
