

optixSDFUnaryOp::Update

optixSDFBinaryOp::Update

optixSDFGeometry::SetCallable
ProgManually

```
graph LR; A[optixSDFUnaryOp::Update] --> C[optixSDFGeometry::SetCallable<br/>ProgManually]; B[optixSDFBinaryOp::Update] --> C;
```

The diagram illustrates a dependency or call relationship. On the left, two white rectangular boxes are stacked vertically. The top box contains the text 'optixSDFUnaryOp::Update' and the bottom box contains 'optixSDFBinaryOp::Update'. On the right, there is a single gray rectangular box containing the text 'optixSDFGeometry::SetCallable' followed by 'ProgManually' on a new line. Two blue arrows originate from the right side of the left boxes and point towards the left side of the gray box, indicating that both update methods interact with or call the geometry's set-callable function.
